Peter,

The first link may give you the data layers you need to look at the Triangle Lake area. Let me know if this doesn't work.

Alan

Alan,

Here's the link the stream layer database that has all the FPA designations

<http://www.oregon.gov/odf/pages/gis/fishpresence.aspx>

The riparian roads layer is basically BLM's most current road layer clipped to a 45 meter stream buffer.

<http://www.blm.gov/or/gis/data-details.php?id=17>

We also have some of our own LiDAR digitized road layers in the drinking water areas and a few other places. If you want that let me know.
